

Stepping UP: Ukrainian Refugees, Changemaking & How to Make Europe a Better Place for All

Hello Europe

The Stepping UP Report is published by Ashoka which is the world's largest network of social entrepreneurs. The report shares challenges and visions from different practitioners. It emphasises "how Europe can and should step up: how to engage refugees if we want to go beyond crisis relief towards re-framing refugees as changemakers."

"The "[stepping UP Report](#)" highlights the diversity of the solutions offered by changemakers and their self-perception, the issues of mental health and access to funding. It addresses such barriers as harmful narratives and propaganda and outlines the mindset shifts that need to take place in order for refugees to be seen as a positive force and valued for their contribution."
