

News Guard

Authors, (year), Publisher

NewsGuard has identified 471 websites spreading false narratives about the Russia-Ukraine conflict, with false claims ranging from Ukrainian genocide to alleged Nazi influence. These narratives, often promoted by the Kremlin's disinformation apparatus, aim to justify Russia's invasion of Ukraine. While some sites are official Russian state media sources, others are not directly affiliated but still support Putin's government. NewsGuard's team monitors these sites and tracks their dissemination of propaganda through various digital platforms since 2018.
