

Gender brief: Livelihoods and access to work of refugees from Ukraine in neighbouring host countries

UN Women (2023)

This gender brief, co-led by UN Women with contributions from ILO and Care International, analyses the challenges faced by refugees from Ukraine, particularly women, in accessing employment and sustainable livelihoods in neighbouring countries. It examines issues such as professional qualifications, employment opportunities, language, care work, protection, gender-based violence, and financial assistance. The brief also highlights good practices in the response and provides recommendations for addressing livelihood challenges.
